

GRIFFIN GORE

IT Systems Engineer | Software Developer

PROFESSIONAL SUMMARY

Results-driven IT Systems Engineer and Full-Stack Developer with a versatile skill set spanning enterprise infrastructure, cloud platforms, networking, security, and software development. Equally capable of architecting server environments, managing endpoint compliance, securing enterprise firewall infrastructure, and building custom hardware and software solutions from the ground up. Combines deep technical expertise across Azure, Active Directory, VMware, and modern DevOps tooling with hands-on proficiency in Python, PowerShell, Rust, JavaScript, and web technologies to deliver end-to-end solutions that bridge business needs and technology.

CORE COMPETENCIES

Infrastructure & Cloud	Azure, VMware/ESXi, Hyper-V, Windows Server, Endpoint Central, SOC-2 Compliance
Network Security	Palo Alto, Palo Alto Prisma, Cisco ASA, Fortinet, Firewall Architecture & Segmentation
Networking	DNS, DHCP, VPN, VLANs, VoIP, Switches
Development	Python, PowerShell, Rust, JavaScript, React, Node.js
Platforms	O365/M365, Azure AD, Intune, SharePoint, Power BI, Google Workspace
AI & Automation	AI Implementation & Training, Process Automation, Workflow Optimization

PROFESSIONAL EXPERIENCE

IT Systems Engineer II - Mangan Inc.	Nov 2024 - Present
- Lead architect and project owner for enterprise-wide PII compliance initiative, developing custom software to identify and secure sensitive data across the organization. - Deploy and manage enterprise firewall infrastructure, primarily Palo Alto with Prisma, handling network security, segmentation, VPN, and threat prevention across the organization; experience extends to Cisco ASA and Fortinet platforms. - Independently designed, developed, and deployed a custom hardware-based timeclock system serving 75+ warehouse and hourly employees, automating time tracking and streamlining payroll workflows. - Built custom budget software with advanced reporting capabilities, enabling streamlined financial tracking and data-driven decision-making for stakeholders. - Champion and lead organizational AI adoption, training team members on AI tools and developing AI-powered automations to increase efficiency across departments. - Led the enterprise Windows 11 migration effort, creating the standardized Win11 image and planning and deploying the rollout to 500+ workstations. - Spearheaded migration to Azure File Services, modernizing storage and access, improving security posture, and aligning with SOC-2 compliance requirements. - Designed and implemented new IT infrastructure for multiple office relocations, successfully moving and onboarding 100+ employees with minimal downtime. - Manage and maintain VMware/ESXi environments, Hyper-V, Windows Server infrastructure, and enterprise storage systems. - Deploy and manage systems with Endpoint Central (patching, software deployment, compliance enforcement) across a distributed workforce.	

- Collaborate with compliance and security teams to strengthen SOC-2 controls, MFA enforcement, and encryption standards.
- Provide enterprise-wide IT support, vendor coordination, and infrastructure improvements across multiple offices.

IT Technical Specialist / Full Stack Developer - Tech-Mar (MSP)

Nov 2023 - Nov 2024

- Administered O365/M365, Azure AD, Active Directory, Intune, and Google Workspace environments for diverse clients.
- Independently developed automation solutions in Python and PowerShell, streamlining workflows, reducing manual effort, and tailoring custom software to meet client specifications.
- Built and maintained websites and digital platforms for clients, ensuring security, usability, and long-term support.
- Owned the entire business and technical lifecycle for projects, from lead acquisition and client sales discussions, through planning and execution, to delivery and support.
- Configured and maintained VMware, Hyper-V, and Azure storage for client environments.
- Delivered client infrastructure projects: workstation deployments, Intune rollouts, SharePoint/PowerApps solutions, and Power BI dashboards.
- Provided comprehensive IT infrastructure support, from network configuration (DNS, DHCP, VPN, VLANs, VoIP, firewalls/switches) to remote desktop troubleshooting and user support.

IT Help Desk & Systems Technician - Global Geophysical

Feb 2018 - Jan 2023

- Assisted in maintaining the company's network infrastructure and provided comprehensive desktop support.
- Prioritized and resolved help desk calls, ensuring timely issue resolution and minimal user disruption.
- Oversaw the setup of numerous desktops and managed inventory control during equipment lifecycle transitions.
- Maintained NAS drives for efficient remote access and data availability.

EDUCATION

Full Stack Developer - Coding Bootcamp - The University of Texas at Austin

Jun 2023 - Sep 2023

B.B.A., Finance (100+ credit hours completed) - University of Houston

2020 - 2023

A.A., Business Administration (3.6 GPA) - Houston Community College

2019 - 2020
